GENERAL NOTES

a) Contractor shall verify all dimensions and any information relevant to site building and services

b) Contractor shall submit shop drawings and details required to supervising engineer for review and approval

c) Any discrepancies must be reported to supervising engineer immediately

d) If contract drawings and specifications are of variance with one another on aparticular item or items , base proposal on the better quality of the conditions indicated or noted .

e) Do not refere to mechanical or electrical plans for architectural layout

f) All dimensions are shown in centimeters , unless otherwise noted

g) No use of scale is allowed , only figured dimensions are to be taken into consideration

DOORS

a) Dimensions shown on working drawings are those for structural openings .

b) Dimensions showing full height of door openings are taken from finished floor level to the bottom of transom at head (structural height) .

c) Dimensions showing the width of wooden doors are taken between outer edge of door main frame .

d) All door grille in wooden doors must be powder coated aluminium on both faces , for location and size refer to doors elevations and coordinate with mechanical .

e) All ironmongary shall be of high standard quality as specified by T&B designer.

f) All glass for steel doors shall be 6mm thick wire reinforced .

WINDOWS

a) All aluminium doors and windows color to be determined by T&B designer samples of all sections accessories and fittings to be submitted to Supervising Engineer for approval.

b) all aluminium doors and windows shall be provided with the necessary hardware and accessories as approved samples by T&B designer.

d) Contractor shall provide aluminium sections for doors and windows as samples to be approved by T&B designer.

GLAZING :

All glass shall be 6mm thick , double glazed unless otherwise noted CLASS A .

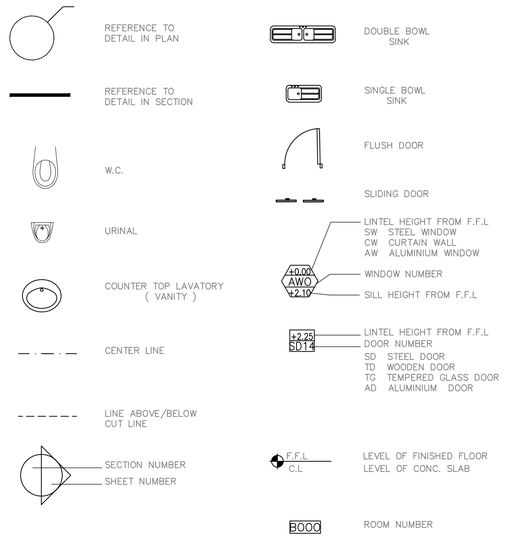

FINISHES

a) All internal walls of shafts to be fairfaced blockwork and /or concrete.

b) All shafts' floors to have cement screed and water drainage.

c) Ceramic tiles to walls shall be carried one full tile above false ceiling level.

LEGEND OF SYMBOLS

GENERAL NOTES FOR TOILETS

1– Ceramic tiles to be determined by T&B designer .

2– Marble tops for sinks to be determined by T&B designer .

3– Water tabs are to be determined by T&B designer .

4– Mirror clear chamfered edges .

5– Toilet fittings to be determined by T&B designer .

a) W.C. _ to be determined by T&B designer .

b) Sink to be determined by T&B designer .

6– General accessories to be determined by T&B designer .

a) Dryer .

b) Toilet paper holder for each single space .

c) Liquid soap dispenser vanity basins .

SCALE 1 : 50 DIVISION 8 SPECIALTIES S 1

SIDE VIEW

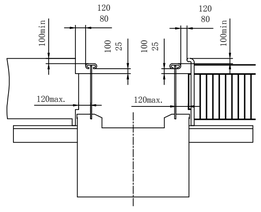

FRONT VIEW

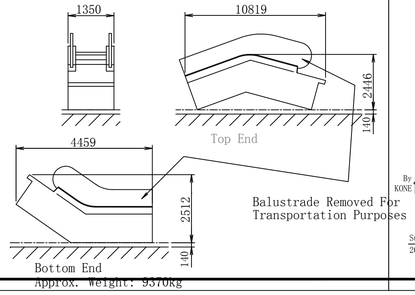

PLANVIEW

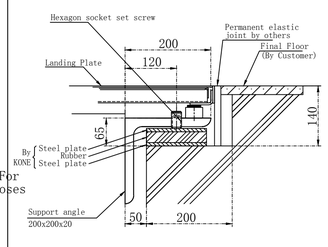

Barriers at Landings

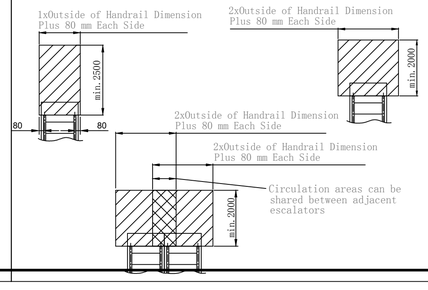

2 Piece Transportation Detail (Floor 0-1)

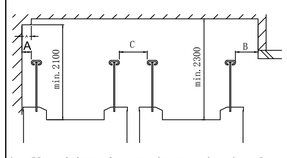

Escalator Mounting Detail

Passenger Circulation Area Requirements

Minimum Clearances Required To Comply With EN115:2008

A = 80mm minimum clearance between the edge of a handrail & wall or other obstacles.

B = If this dimension is less than 400mm a headguard is required.

C = For adjacent escalators the distance between adjacent handrails shall not be less than 160mm

Note:
1. All dimensions are in millimeters.
2. Center support required when distance between mountings exceeds 16370mm (30/3 1.5/1.0).
3. Access opening 2500mm wide and 3300mm high into and through the building is required.

Prior To Installation

Clean Site & Storage
Ensure the working and storage areas are clean, dry and protected from the weather.

3-Phase Power Supply
Ensure permanent 3-phase power is available for the assembly and testing of the escalator.

Protection from Damage
Ensure protection of the escalator equipment from damage
No other trades to proceed during the work progress.
